

Dear Juniors,

If you want to be able to pass AP Biology as a class, you need to do all of your assignments; as ~~repetitive~~ repetitive as it ~~is~~ may sound and as small as it may seem, being on top of your assignments is what seals the deal. If you hold off on turning them in on time, you end up becoming more and more relaxed and nonchalant — you may be a Senior and your classes may seem minimal in comparison to college applications and what your plans are as an Undergraduate freshman, but if you neglect your core classes, it looks bad on your transcript (even if it's the last quarter! Your colleges may ask for a final transcript, and if they see that even though you passed the first three quarters, if you show that you've fallen incredibly in ~~on~~ your fourth quarter, it just shows them poor work ethic). In terms of passing your AP exam in Biology, I would recommend cracking down on remembering concepts like genetics (Punnett squares, allele frequencies, etc) and ~~the~~ ~~study~~ evolution.

Practice memorizing ~~the~~ any terms that are related to these topics by using study habits that are suited for YOU. If notecards help you, USE NOTECARDS. If reading out of the textbook and making your own notes based on the chapter helps you, DO IT! If you know you're capable of passing the exam, ~~do it~~ give it your all! Don't do it because your teacher tells you or because your counselors tell you; do it for YOURSELF. Past ~~been~~ potentially being ~~a~~ a scholar, by passing the exam, you ~~enable~~ enable yourself to ~~take~~ take classes that you want to take based on your major instead of your basics.

Past just that, if you apply yourself through and through, you make your Senior year a LOT easier. I wish you all the best luck — I know you have the capability to do literally anything, even if you think you don't.

Sincerely,
Alayna Gomez
Class of 2016

dear Class of 2017,

July

Well if you like science & it interests you, then you'll like AP Biology. What I liked at the beginning of the year was that in AP BIO you are able to do many labs. We recently dissected a frog and even though I expected to be disgusted by it, it was actually pretty fun. AP Biology is full of so much information, so it's important to try not to get overwhelmed. Senior year flies by so don't worry you'll be done w/ AP BIO faster than you think. If science is not exactly your favorite subject (it's not mine either) then make sure to give this class your all because by passing the Ap test you can get college credit and not have to worry about so much science after high school. Notes and diagrams are helpful for this class, so try to keep them for studying later. Take advantage of all the things AP Biology teaches you, you never know what you'll need to remember later in life.

Sincerely,

Someone who's done w/
AP Biology :)

Dear Juniors,

eventhough 12th grade is one step
closer to college, its not as hard
as it seems. Doing your homework and
studying would help you pass
12th grade.

Dear Junior,

If you have thought your science classes are easy, you are in a shock for AP Bio. I promise you that there are going to be moments when you just feel so overwhelmed with work but you're gonna have to just push through. Expect to have tons of homework because there is going to be too much content to learn that it is impossible to cover everything in a class period. Work hard, it'll be worth it when you get that A at the end of the year,

— Senior
(Joey Lucio)

Dear Juniors.

There's a lot of work you have to do. It's a lot of fun. Also for you to be able to understand the class you have to pay attention and do your homework. If you don't do that there's a probability you may not pass your exam. Try your best and never give up.

Dear Juniors,

AP Bio is what you make of it, if you don't participate and aren't involved you'll most likely hate Bio. If you enjoy experiments and topics such as ecology, genetics, and so much more, then you will love Bio! Make sure to always pay attention and most importantly, study! Because Bio is vocab ~~heavy~~ and scientific terms heavy. For me, since I love Biology, I had an A+, so at the end of the day participate, study, and do your hw, and I guarantee you will have an A+!

Sincerely,

#Class of 2016
Senior

Dear Juniors,

AP bio is one of those classes that you have to get through.

Its not the ~~best~~ most fun class but it also won't be the hardest class you'll take this year.

Just do your work and try to get by and you'll be fine.

Don't let the stress of the AP test get to you because you also

have four others to worry about.

Survive the year, and that applies to all classes.

Good luck

- Nat

Dear Juniors,

If you like Biology, then this class is for you. You should expect a lot of work, labs, study guides and assigned readings. However, it is not as bad as it sounds, it is still pretty fun. For those who feel that Biology is difficult, it's okay, you will do fine. Do your work, turn in your homework on time, collaborate during lab experiments, give it your all - with these methods you are guaranteed to pass AP Biology. The AP Test is a whole other aspect of this class. If you want those college credits, STUDY, STUDY, STUDY! As a senior you will see the importance of passing as many AP tests as possible. Nonetheless, AP Bio will be a great class, count on it. Good luck.

① • Be expecting a lot of review and homework. Hard work needs to be a must.

② • Do all the work given to you in order to pass the class. Do corrections in everything you can and just believe in yourself in order to pass the AP Test.

③ • Dissection was the most fun.

④ • The AP Test was the hardest.

Alex Flores

Dear Juniors,

For biology you should expect to study a lot. Biology is such a broad subject and everything is connects. If you cannot connect something ask questions, stay afterschool. The four main Big Ideas for Biology are: Evolution, DNA, Ecosystems, and the other one I don't remember but they should all connect. What can I say I like Biology but I feel it requires a lot of studying and dedication. Whenever doing a lab follow all instructions do not try to get ahead. Try your best, be nice to your new teacher and enjoy senior year it is absolutely the best.

Sincerely a senior

Dear Juniors,

First of all Stop being lazy and focus. This is going well it is your last year in high school. If you don't let go of your bad habits, well good luck. Expect a lot of memorization and a man by Mr Anderson.

If you want to pass this class study memorize because its mostly all memorization. ~~At~~ At the end you'll enjoy the dissection

Dear Juniors,

AP biology was an easy subject if you ~~are~~ pass all our test or finished all our homework. Remember to never procrastinate because then homework can really bring you down. The best part was the labs we got to do throughout the year. The ~~hardest~~ ~~messiest~~ thing was FRQ's well mostly because I hate writing. Just enjoy and it's an easy credit if passed in high school.

Sincerely, Daniela
Moulton

Dear Juniors,

You should expect a lot of homework for test i don't know what teacher you will get mabye it will.

Just do your homework and study to pass the class. The most fun was the frog dissection. The hardest was the tests. Good Luck!!

Sincerely, Liselle L.

Dear Juniors,

To pass that AF Bio
you just need to read and study the
book. I think the most
fun was dissecting the frog
The hardest was the
cell respiration process.

Melvin Reynolds

Dear Juniors,

For Biology you should expect to watch
a lot of bozeman videos, read, and study.
In order to pass you have to review
try not to be dedicated. The most
fun activity was doing the labs.

Thank you

Dear Juniors,

AP Biology awaits you. It is an interesting class where a lot of things might

frustrate you, but it is fun.

Get used to watching Bozeman videos because they help a lot, and

turn in all your work because it pays off.

From a
Senior

Expect a hard working class.
In order to pass AP Biology,
always turn in homework, try in
your tests, and do the test
corrections.

The hardest part in this class,
its the FRQ. You have to write what
you remember about certain topics.

Dear Juniors.

May/18/16

AP Biology it's going to be more than tough. You're going to hate it some days and love it others, so now that you know, you have to prepare yourself to tons of work, information and easy math problems that seem hard. Never give even if the question seem to hard you never know if it's going to be more easy as you thought. Also don't forget that as any science class, you have to memorize a lot of information sometimes to the extent to have pains in the head. Don't worry, you will be fine.:) Bio it's gonna be very interesting as well, evolution & genetics would show you about the Awesomeness of life and humans. Hope you can pass the AP Biology test and get more credits (if you have). So tried very hard, pass that test, and get 100 dollars in your pocket.:)

Sincerely Karla Corbella

Dear Juniors

AP Biology can be difficult if you don't like science, however, there are parts that are very interesting and is cool to know how weird our body is.

Some advice:

- Always turn in your stuff on time
- Don't feel bad about tests. If you do your work and pay attention, tests do not affect your grade that much.
- Study & ask lots of questions in order to pass AP

Alexandra
Corbella

Victor MIZ

Juniors, expect to read a lot! You have to actually do your homework this class if you want to pass. The most fun is all the labs you do. The hard thing is that theres always homework.

Dear Juniors

You are going to get alot of home-work, so all you can do with it is put up with it and do it or you will fail. The most fun was when we would do alot of exipents.

Andrew

We don't know what kind of teacher you juniors are having but AP Bio is pretty straight forward. Honestly just stay on task and do all the work that is given to you. Learn to memorize vocabulary words so that they can help you pass the AP. Also always take the unit exams seriously it feels good to get a good grade. Smiley face. 😊

Dear Juniors

AP Biology is difficult but ~~you can~~
y'all can handle it, be prepared for
a ton of homework, ~~the~~ Watch
Bozeman videos, he is super cool and
awesome he is my hero. The most
fun was watching Mr. Bozeman videos.
Having to say goodbye to Mr. Bozeman
videos ~~was~~ the most difficult and heartbreaking
thing.

Sincerely - Isai Garza

Dear Juniors,

→ you should expect a lot of writing. The FRQ could save you a lot of money (AP exams). Bozeman video ~~could~~ could help you study and they are very informational. What well for me in AP Bio all the activities we did.

It really help in getting a good grade. It can be really hard and challenging, but ~~everything~~ everything will be fine if you just put in the work

Thank you,

Hector Torres,

Dear Senior,

AP Bio is a hard, but
 very ^{representing} class if you
 pass the AP Bio Exam. Bio is
 almost like 9th grade Bio
 but I bit more specific. You
 must study, stay after class
 and actually read the AP Bio
 book through-out the chapters. This
 is an actual college course, and
 I would like to change my
 attitude and would of loved to
 try harder and focus on all
 the content. Senior year will
 pass after than you expect
 and the AP Test will be
 easy if you took your own
 time to practice.

Sincerely Humphrey Bana

Dear Juniors,

You all should expect to work hard in class and to study a lot because there are lots of things to memorize. Advice to pass class and the AP exam is to go to as many tutorials as possible. Also study and do all your work. The most fun thing was doing fun experiments and playing review games. The hardest thing was the FRQs.

-Edgar Ayala

Dear Juniors,

You will all suffer, you will bleed, you will cry,
unless you study for the multiple choice and FRC. You
should expect to stay after school to keep up your
grade. The hardest thing is trying to cleanly remove
the eyeball of a frog. The funnest was
amputating the leg of a frog

- Marc Pucci

Dear Juniors,

I think the Bio Ap class is going to be a lot of fun for you guys. There are lots of cool things to learn about, like from bacteria to the biosphere. We learned about a website called [boreman-science.com](http://www.boreman-science.com). Take a look into it, it will really help you in the class. Learn how to write French, they will give you love and respect and can really come in clutch.

-Victor Cal

Dear Juniors,

Expect lots of work, tests, reviewing, and stress.

If you want to pass the AP test just study and don't cram, relax.

The projects and labs were the most fun things to do in class since they were hands on and you got to experience the lecture first hand.

The hardest part was at the end just reviewing all the time and taking too many tests. But overall the class is alright.

-Eddie G.

Dear Juniors,

again! Next year if you feel really stressed and need a break just remember that you will get to comfortable with taking a break! Trust me your senior

Year will fly by so quick that you'll ~~be~~ regret not taking advantage of the fact that you could've had better ~~of~~ grades and being able to pass the AP exam!

The most funnest time are spread out throughout the year so I can't promise you something being fun every/day! Anyways don't forget to do your summer assignment it's very important. Goodluck!

- Lidiana BC:

Goodluck Class of 2017!

Be friendly with one another **them** because you might never see

Dear incoming seniors,

Ap Biology is just like normal Bio but harder and more unit tests etc.. I recommend for you to actually manage to do the homework for this class. All that matters is for you to put effort, honestly that's all I would do → I would actually do my homework, it didn't matter if I was doing it at home or last period but I would manage to finish it! Do it and you will be good for this class, I - A10
Promise YOU! :) **dont SLACK OFF!!**
dont be like me.

Dear Juniors,

Please do not come into this year thinking you know everything. There will be questions you don't have answers for. There are quizzes that you will fail. But don't focus on these things. Embrace the fact that you are a Phoenix at all times. Bozeman videos will be the savior for this class. Interacting ~~the~~ with the environment and the dissection will be the most fun you will have here. Try your hardest on all parts of the exams. I wish you the best of luck and I hope this was helpful.

Sincerely, 
(Daniel Lopez)

Dear Juniors

Sorry that you did get to have Mr. Hood. But if you don't understand what is going on Boseman videos they are Hella helpful. The amount of experiments are great too. And then the math will "kill" him of.

from

~~Jesse~~
~~Jesse~~

PS Hi mya!!! 😊

PSS. Hi everyone else!!!!

Dear Juniors,

05/18/16

AP Biology class will be a lot of reading and memorizing. Don't feel intimidated, ...

if you know the vocabulary, you are

already more than halfway there!

It will be hard since the questions on exams will have a lot of writing (with

many details) and multiple choice questions with 5 answer choices that are rigorous.

However, you will learn a lot about biology and even yourself. This class will make you

re-evaluate your work ethic since you will have a lot to do in bio class and senior year.

Do your homework to pass the class!

For the AP class tests, use details. They will make a HUGE

difference. Learning about DNA and

what mistakes in it can cause war is fun!

The level of rigor in the tests was the hardest.

I was not used to it. I hope this helps?

Good Luck & Enjoy it! ☺

Jamiles Lopez

Dear Juniors,

Senior Year will be fun and hard at the same time. There will be so many things that will change for example friendships. Don't get too comfortable with the one's you've got now because like in the middle of the year they will completely change. But don't worry better one's will come. I don't have much to say but to start looking for your college Signing Day outfit like now, it will be the hardest thing if you wait for the last minute on & your field lessons, most amazing thing ever especially the last day.

P.S. I did this in 5 minutes if it's crappy sorry not sorry!

- Ana 

Dear Juniors,

Welcome to AP Bio!

Be ready to challenge yourself! I wish you the very best and I would like to give you a few words of advice. AP Bio is an interesting subject but very complex. I encourage you to try to think outside the box and never settle for just learning the definitions of a word. Instead, try to connect every idea to something previously learned. The exams are not complicated, but they involve you putting everything ~~learned~~ learned into perspective. Look at specific examples from the books ~~look at~~ pay close attention to projects and labs.

~~Mr. Wood was an awesome teacher, & I hope you learn to value any teacher who teaches you instead of him.~~

The class does go pretty fast because there is so much to learn. Start reviewing for the AP exam early and maintain calm throughout the many tests you will take. If you pass them you will get rewarded and college credit.

Have fun most of all and goodluck!

u/love, Priscilla Ruyes

Dear Juniors,

Senior year will be full of surprises. Surprises that you might not be ready for but trust me, you will survive! To help you out, here are some advices...

- ▷ enjoy every minute of your time here.
- ▷ be productive at all times.
- ▷ don't expect to sit back and chill... you will work until the end!
- ▷ Please listen and take the advices that your teachers give you. Why? Because at this point of your life, they will be life lessons.
- ▷ Not only follow your dreams but catch them and make them reality.

- Rosa guerra

Dear Juniors

The way you can pass this class is if you do all your work and study. When the AP test comes ~~down~~ calm down and ~~will~~ study ~~seriously~~ and smart. Don't be lazy. There will be some ~~times~~ where you want to just give up but don't you can do it.

A handwritten signature in blue ink, appearing to be "C. N. Hilly", written over a horizontal line.

Dear, Juniors

I recommond you guys to try your best, so that you guys won't have hard time trying to pass. Just do your work and listen to the teacher.

Eni U.

Dear Juniors

Expect to have lots of fun! The way to pass this class is to take very good notes and read everything on the textbook. The most fun I had was doing home work. The hardest was taking the exams and passing them.

- Francisco J. Cruz.

Best memory I had was with my best buds Beto and Edgar. we were in class messing around real bad to the point that I wanted to cut beto's ugly hair off.

P.S Get ready for mr. Anderson.
